Working Experience

BACKEND DEVELOPER
Cathedral Software SL

March 2021
Currently

Development of backend services based on Django + Django REST Framework, for corporate tools focused on energy management and the energy market. TDD (Test-Driven Development), Scrum, and continuous deployment based on Docker and Kubernetes containers.

SYSTEMS ADMINISTRATOR (Databases and Middleware)
VIEWNEXT

April 2018
August 2020

Management and administration of Oracle, Microsoft SQL Server, and Teradata databases, followed by integration into the Middleware department, performing tasks related to Oracle WebLogic and Red Hat's Jboss application server management, mainly serving the banking sector.

FULLSTACK WEB DEVELOPER
Freelance

December 2016
November 2017

Full-stack web development (Bootstrap, Django, Angular) in at least two startups. Hybrid mobile development based on web technologies (Ionic and Apache Cordova). Mainly focused on web development and maintenance of enterprise software. Worked on or maintained projects created with WordPress, Laravel, Craft, Dojo, Angular, and Ionic.

FULLSTACK WEB DEVELOPER
Seyte SL

June-November 2016

Mainly focused on web development and maintenance of enterprise software. Worked on or maintained projects created with WordPress, Laravel, Craft, Dojo, Angular, and Ionic.

FRONTEND DEVELOPER
Coderty Studio

March-June 2016

On-the-job training during the Higher Vocational Training. During my stay, I received training in Angular from the company and developed components for Ionic-based applications.

MICROCOMPUTER TECHNICIAN
ABBYX Multimedia

March-June 2013

On-the-job training during the Vocational Training. Most of my tasks involved providing technical assistance and repairing smartphones and computer equipment.
